hi yue,
great work! :) however i'm getting "Gateway Timeout: can't connect to remote host " ... i'm able to connect to other websites so i don't think it's a problem at my end.

Hi Helen,

If you are running Windows 7 on your computer, can you try to enter
cmd
on start menu search bar??
It should bring up a DOS-like window.
If the above steps worked, can you type
ping upstage.aut.ac.nz
If it can receive responses from the server, we will need to think of something else.

We probably need a backup plan for our meeting. We can set up a video discussion over Skype.

Yue
