## RECENT ACTIVITY

 **Mikhail Chen**  
18 hrs

So what time shall me meet up tomorrow?

[Like](#) · [Comment](#) Seen by 4 **James Williams** I can meet up anytime  
18 hrs · Like **Mikhail Chen** Me too, how about after lunch, 12:30?  
18 hrs · Like **James Williams** Yeah that would be fine  
18 hrs · Like **Takuma Satu** Got it 😊  
13 hrs · Like **Mikhail Chen** shall i bring the poster to come?  
4 hrs · Like **James Williams** yeah if you want to, I wouldn't mind seeing it, take good care  
of it though 😊  
4 hrs · Like **Mikhail Chen** I would like to leave it home, just in case  
4 hrs · Like **James Williams** sweet as no worries haha  
4 hrs · Like Write a comment...   **James Williams**

Yesterday at 11:28am

We should probably get the Poster printed tomorrow or Wednesday at the latest **Takuma Satu** **Mikhail Chen** are either of you going in to uni or do you want me to get it printed? Also we need to agree it's finished before printing it, and there's sometimes weird formatting issues when saving it as a PDF just to be aware of

[Like](#) · [Comment](#) Seen by everyone **James Williams** Also, do you think we should send Helen and Vicki the motivational document and my proof of concept I sort of finished, as I don't think Anne has replied to either we've sent her  
Yesterday at 12:18pm · Like **James Williams** I've written up a draft and might send it, but before I do has anyone else had any luck with finishing their proof of concept or a helpful document for developers etc of any kind?  
Yesterday at 12:34pm · Like **Mikhail Chen** I'm going to uni right now, if the poster is ok to print out I can do it, or wait for meet up?  
Yesterday at 12:49pm · Like **James Williams** I reckon it's ready to be printed but when you save it as PDF some of the text gets all screwed up  
Yesterday at 12:51pm · Edited · Like **Mikhail Chen** Oh, really? I'll try format again later  
Yesterday at 12:55pm · Like **Mikhail Chen** By the way, are you in uni?  
Yesterday at 12:55pm · Like **James Williams** no I'm not  
Yesterday at 12:55pm · Like **James Williams** I just fixed it and uploaded it here  
Yesterday at 12:56pm · Like

 **James Williams** I guess it's ready to be printed

Yesterday at 12:56pm · [Like](#)

 **Mikhail Chen** Oh, that nice. Do u want me to print it out today?

Yesterday at 1:07pm · [Like](#)

 **James Williams** yeah sure haha I can't think of what else we would change so I guess it's finished

Yesterday at 1:07pm · [Like](#)

 **Takuma Satu** Looking really good. I also think it is finished

Yesterday at 1:14pm · [Unlike](#) ·  1

 **James Williams** Gonna start working on the portfolio as its due friday and we're at the poster presentations all Thursday and I have work tonight and wednesday. **Mikhail Chen** I think you did the most work fixing bugs this semester, can you please add in the issues from GitHub that were fixed this semester? I think for the ones from last semester we just used screenshots of the issues that were closed going from most recent

Yesterday at 2:23pm · [Like](#)

 **Mikhail Chen** hmm, I cant close the issues I fixed by myself, because these were not created by me I think

Yesterday at 2:59pm · Edited · [Like](#)

 **Mikhail Chen** Those two issues are not closed yet

Yesterday at 2:59pm · [Like](#)

 **Mikhail Chen** Should I write comments to tell Helen to close ?

Yesterday at 3:02pm · [Like](#)

 **Mikhail Chen** Oops, i think AUT account probably can close, i m trying

Yesterday at 3:03pm · [Unlike](#) ·  1

 **Mikhail Chen** I just screenshot that recently issues fixed and put it into the portfolio folder

Yesterday at 3:09pm · [Like](#)

 **Mikhail Chen** should I put it into the QA folder or anywhere else?

Yesterday at 3:12pm · [Like](#)

 **Mikhail Chen** And I going to print the poster~

Yesterday at 3:14pm · [Like](#)

 **James Williams** ok cool, umm i'm not sure we'll figure it out

Yesterday at 3:15pm · [Like](#)

 **Mikhail Chen** oh, just tell you i saw your time tracker file is modified and not be committed, because it is a exclamation mark in front it

Yesterday at 3:22pm · [Like](#)

 **James Williams** yeah if you're on the computer on the left there was a conflict and it won't update to the latest version. I've got the correct version on my PC at home and I've committed it to the SVN

Yesterday at 3:24pm · [Like](#)

 **Mikhail Chen** The printsprint said our AUT logo is not appriate for design science, so i just changed that

Yesterday at 3:53pm · [Like](#)

 **Mikhail Chen** damn them, so care about the logo

Yesterday at 3:54pm · [Like](#)

 **James Williams** what? How is it not appropriate? what does the AUT logo have to do with design science?

Yesterday at 3:54pm · [Like](#)

 **Mikhail Chen** They said the logo should not have the words such as "new zealand, auckland", and the logo should not have the white box

Yesterday at 3:55pm · [Like](#)

 **Mikhail Chen** They have an example but they are not willing give it to me

Yesterday at 3:55pm · [Like](#)

 **James Williams** oh what, thats so weird, why wouldn't they want people to know its in auckland, new zealand 😊

Yesterday at 3:56pm · [Like](#)

 **Mikhail Chen** I just found another one online but still with the white box, they accepted

Yesterday at 3:57pm · [Like](#)

 **Mikhail Chen** they said thats for marketing, not for design science

Yesterday at 4:00pm · Edited · [Like](#)

 **Mikhail Chen** Screw them, they have an example but dont want to give to us

Yesterday at 3:59pm · [Like](#)

 **James Williams** haha, so is the one you changed it to alright with them?

Yesterday at 4:01pm · [Like](#)

 **Mikhail Chen** yeah, they discussed it and reluctantly accepted it

Yesterday at 4:02pm · [Like](#)

 **James Williams** haha so even the one you changed it to had something wrong with it?

Yesterday at 4:05pm · [Like](#)

 **James Williams** its the same as the one they used last semester so it must be alright

Yesterday at 4:05pm · [Like](#)

 **Mikhail Chen** Yes, they said just dont use the logo with the white box next time

Yesterday at 4:06pm · Edited · [Like](#)

 **James Williams** oh because it has a white background.. we probably could have found a transparent one somewhere...

Yesterday at 4:06pm · [Like](#)

 **Mikhail Chen** No, that logo is placed on green background place

Yesterday at 4:09pm · [Like](#)

 **James Williams** yeah but its black so it still would have been visible, but then the UpStage logo is on white anyway so I guess its good that they match

Yesterday at 4:10pm · [Like](#)

 **James Williams** anyway if you've already given it to them to print then its fine

Yesterday at 4:10pm · Edited · [Like](#)

**Mikhail Chen** Yup, it is already printed out

Yesterday at 4:12pm · [Unlike](#) ·  1

**James Williams** cool thanks!

Yesterday at 4:12pm · [Like](#)

**James Williams** gonna go to work now so cant do any more tonight

Yesterday at 4:12pm · [Like](#)

**Mikhail Chen** All good, so shall we meet tomorrow or wednesday?

23 hrs · [Like](#)

**James Williams** I guess we could meet tomorrow, do you want to discuss the portfolio or what we're going to talk about when we present our poster?

21 hrs · [Like](#)

**Mikhail Chen** we can discuss both of them, i m ok with meeting up tomorrow

20 hrs · [Like](#)

November 2 at 7:23am · Auckland

How is every one going with the testing??

I have put my results on the AcceptanceTests.xml on SVN. I'll write up the testing summery if everyone can put their results by tomorrow 😊

[Like](#) · [Comment](#)

Seen by everyone

**Yue Li** Have done half of em. Will finish it today

November 2 at 8:34am · [Like](#)

**James Williams** was trying to get my reflective report done, will do my testing now

November 2 at 11:33am · [Like](#)

**Takuma Satu** I got to finish my reflective report now lol

November 2 at 11:56am · [Like](#)

**James Williams** also we need to make any final changes to our poster and one of us has to go get our print sprint forms and get it printed

November 2 at 12:25pm · [Like](#)

**Mikhail Chen** i ll put my results tomorrow

November 2 at 12:34pm · [Like](#)

**James Williams** everyone should use the same row with the date 1/11/14 for all of the tests just to make it easier to work with and read

November 2 at 12:59pm · [Like](#) ·  1

**James Williams** **Takuma Satu** did you test on the server at AUT? I'm using my virtual box and I can't upload anything for some reason, I think this happened to me before when we tested Ubuntu, and I when I switched to the server at AUT it was fine

November 2 at 2:28pm · [Like](#)

**James Williams** I tried chrome, safari and firefox, all get the img2swf error

November 2 at 2:30pm · [Like](#)

**James Williams** I think it's a virtual box issue 😞

November 2 at 2:30pm · [Like](#)

**Yue Li** Which case is it???

I tried to upload image(gif) via Ubuntu last night.  
It works fine (though it has the >1m message)

November 2 at 3:00pm · [Like](#)

**James Williams** uploading any kind of image file, i think its just an issue with the Debian on my PC's virtual machine, I think it's the same problem I've run into before and redoing the tests at uni seemed to work. were you using the virtual box image or the server at uni?

November 2 at 3:04pm · [Like](#)

**Yue Li** I did it on the Debian Server at uni.

maybe I can try to upload some other media types..

November 2 at 3:21pm · [Edited](#) · [Unlike](#) ·  1

**Yue Li** wonder if red5 server is set for uni 8081 site??

November 2 at 3:27pm · [Like](#)

**James Williams** I just found my notes on Red5, it's on port 5080, according to this, and the url for streaming is rtmp://upstage.aut.ac.nz/oflaDemo

November 2 at 3:31pm · [Edited](#) · [Like](#)

**James Williams** looks like the red5 server is accessed via upstage.aut.ac.nz:5080

November 2 at 3:32pm · [Like](#)

**James Williams** but first it has to be started from the server, there should be a red5 folder on there somewhere, probably the desktop but I can't remember since they installed the new Debian

November 2 at 3:32pm · [Like](#) ·  1

**Yue Li** I uploaded different files.

it seems only swf troublesome.

the upload process is fine; however, entered the stage, it shows blank for the avatar..

Everything works fine on Windows.

Guess it only happens to Ubuntu

November 2 at 4:28pm · [Edited](#) · [Like](#)

**James Williams** whats wrong? you cant upload swf files for avatars?

November 2 at 4:28pm · [Like](#)

**Yue Li** I'm gonna install all medium codecs, see if it can be fixed

November 2 at 4:29pm · [Like](#)

**Yue Li** There is no issue for uploading.

the problem is when I enter to the stage, the both swf avatar and swf backdrop show blank...

thinking it's a codec problem  
November 2 at 4:30pm · Like

 **James Williams** you're right, on the live upstage site both the 8081 version and the 8083 version have this problem. I think we must have missed it due to the test passing as long as the file was uploaded, it still seems strange that no one picked up on SWFs not showing on the stage until now though....  
November 2 at 4:36pm · Like

 **Yue Li** I think it only happens to Ubuntu user  
As I also tried on Windows 7, it works fine xD  
November 2 at 4:38pm · Like

 **James Williams** really? I just tried uploading an swf avatar on windows 7 on upstage.org.ac:8081 and 8083 and it didn't show up on either  
November 2 at 4:41pm · Like

 **Yue Li** Does your Windows 7 have Shockwave player installed???

November 2 at 4:43pm · Like

 **James Williams** actually probably not now that you mention it  
November 2 at 4:44pm · Like

 **Yue Li** swf works on UpStage PC at uni.... I checked some threads.  
some say swf requires some specific decoder "shockwave" plugin or something.  
not entirely sure how it works...  
November 2 at 4:47pm · Like

 **James Williams** yeah I think swf stands for shockwave flash so either way it will be replaced eventually because of Flash  
November 2 at 4:48pm · Like

 **Yue Li** Completed regression test on Ubuntu 14.04ls with Firefox 33.0.  
I created a new folder to hold our temporary test results (just in case stuff go everywhere ) **Takuma Satu**  
I also wrote a txt file for some tests (faults that w/o test scenarios)... [See More](#)  
November 2 at 5:57pm · Like

 **Mikhail Chen** Updated the test result of FireFox Win7  
Yesterday at 3:00pm · Like

 **Gaoxin Huang** hi, **Takuma Satu**. I have updated the test result of Chrome Win7 .+The path is the same as Yue's :D:\UpStage\Documentation\2014 - Semester 2\Testing Summary\temp\_test\_documents\_sem2\_2014

October 30 at 12:29pm

Second lot of feedback from Anne:

Hi James,

That is certainly much better. The content is clearer and there is more consistency. Additional areas for improvement would be:

1. Inconsistent line length tends to make the poster look messier overall eg the longer lines under the Project Objectives section. This does not help the reading flow either.
2. You could match your processes to the design science phases and indicate which phase/s you have completed and what artefact/s you produced to complete.
3. Not sure about your stage image – don't you have something a little more exciting than a light bulb avatar?
4. Don't think 'ancient' is the right descriptive word for code that is at most 10 years old. A lot of large systems used in NZ are more than twice that age.
5. Need to link the reference for the design science image to the image. You can do this easily by numbering the references eg [1] and then putting the number under the image.

Hope that helps,

Cheers,

Anne

**James Williams** Sort of fixed 2, can't see where to put which artifacts have been produced though..

Fixed 4

Fixed 5

October 30 at 2:33pm · [Like](#)

**James Williams** Tried to fix 1

November 2 at 4:26pm · [Like](#)

**James Williams** hopefully fixed 3 with Destiny character art lol

November 2 at 4:52pm · [Like](#)

**James Williams**

October 30 at 1:07pm · Edited

Looks like we'll have to do the testing individually.

Browser allocation:

Yue: Firefox on Ubuntu

Gaoxin: Chrome on Windows 7

James: Chrome on Mac

Mikhail: Firefox on Windows 7

Charlotte: Safari on Mac

Takuma: Firefox on Mac

[Like](#) · [Comment](#)

Seen by everyone

**Mikhail Chen** I can do firefox on win7

October 30 at 1:14pm · [Like](#)

**James Williams** cool and the other two are mac, are those browsers alright Charlotte Paterson and Takuma Satu?

October 30 at 1:15pm · [Like](#)

**Takuma Satu** I'll do FireFox on Mac

October 30 at 1:21pm · [Like](#)

**Takuma Satu** and safari

October 30 at 1:22pm · [Like](#)

**James Williams** ok but then Charlotte doesn't get to do it lol

October 30 at 1:23pm · [Like](#)

**James Williams** unless she does Chrome and I just don't do it. I've already spent enough hours for the paper anyway haha

October 30 at 1:24pm · [Like](#) ·  1

**Charlotte Paterson** Im not phased. Just let me know which one i should do

October 30 at 3:05pm · [Like](#)

**Takuma Satu** cool 😊 Charlotte, could you do safari on mac?

October 30 at 9:48pm · [Like](#) ·  1

**James Williams** ok sorted, so I'll still do Chrome

October 30 at 11:08pm · [Like](#)

**James Williams** oh I just realised you have to be at AUT to access the server so unless you have a copy of the Debian with the server for Virtual Box Charlotte Paterson, @takuma might have to do Safari as well if that's ok.

When are we aiming to have everyone's testing done by?

October 31 at 3:36pm · [Like](#)

**Charlotte Paterson** Yeah im sorry I cant help. If it can wait till tuesday I can do it then but might be best for tukuma to do it if possible

October 31 at 3:38pm · Like

 **Takuma Satu** Yup, i can do safari as well by tomorrow late afternoon

Does anyone have a clue of what "Not Repeatable by AUTTeam" means?  
This is a label on team Github...

I wonder if it is a typo??? "Not Responsible by AUTTeam"????

Like · Comment

✓ Seen by everyone

 **James Williams** it means we can't get the bugs to happen because they only happen for people in the UK or other countries other than NZ  
October 31 at 2:30pm · Like ·  1

 **James Williams** or there are some cases that are just so random we can't establish what causes the bug or why so we can't try to fix it  
October 31 at 2:31pm · Like

 **Yue Li** Thanks.  
That makes a lot sense.

Dont know Anne would say most major issues were fixed...  
From the tests of previous teams, only functional tests presented.

There seems no record of blackbox tests.

October 31 at 2:37pm · Like

 **James Williams** Anne replied:  
Hi Yue,

Have you had a response from Helen about this? What do James and Takuma say about what version they should be using?

It is pretty concerning if a version has been provided with such a substantial set of bugs.

Cheers,

Anne

October 31 at 3:51pm · Like

 **Yue Li** Yes, I'm reading it.  
October 31 at 3:51pm · Like

 **James Williams** I think the version on 8081 is the released Version 3 and 8083 is the beta which apparently doesn't have the same problem. This suggests its a new bug introduced last semester, possibly something to do with a fix for a different bug.  
October 31 at 3:52pm · Like

 **James Williams** I think this just goes to show how trying to fix bugs just creates more bugs.  
October 31 at 3:57pm · Like ·  1

 **Yue Li** It seems to me, we have a synchronization problem between different users.. Such issue does not occur every time..  
I also have sent Helen an email on confirming the version. As I checked upstage site uses the one from the beginning of this year.  
8081 and 8083 both show "UpStage 3.0 BETA (13/12/2013)"  
October 31 at 3:58pm · Like

 **James Williams** Yeah, from their original emails they installed the version after we made it a release on GitHub, but then after that they noticed the footer still said beta so I changed the footer on the latest version on GitHub but I think it's still the release version without the footer on 8081  
October 31 at 4:00pm · Like

 **Yue Li** I thought so.  
The issue I had last night on aut site is the same as this one

 **Yue Li** From Helen's email on August 4:  
upstage.org uses:  
8081 has the latest version  
8083 is reverted back to development with v3  
8084 & 8082 are on v2.1  
not sure about martin's version in detail..  
There is no information about martin's version

Error

UPSTAGE.ORG

October 31 at 4:29pm · Like · Remove Preview

 **Yue Li** an update:  
Anne wants us to contact Vanessa Henderson, and ask her if she knows which could be the latest version...  
October 31 at 5:21pm · Like

 **James Williams** I don't think Martin's version is the 3.0 beta that they want to use, the team in Semester 2 2013 released version 3 beta after merging with Martin's and that is what is on 8083 at the moment that doesn't have the new bugs (I think)

October 31 at 5:26pm · Like · 1

 **James Williams** You said you were able to repeat the same bug as them so that two different windows of the same stage had different backgrounds. Can you post here what steps to take to get this bug to happen?

October 31 at 5:42pm · Like

 **James Williams** Also, we aren't telling them to revert, if 8083 is fine they can just use that one, there's no need to immediately revert 8081, although re-downloading the latest version from GitHub and re-deploying that to 8081 might be a good idea, but would have to be done by Paul...

October 31 at 5:45pm · Like

 **Yue Li** The one I had was not about different backdrops.  
The one I had was avatar showing differently on the stage for different users

October 31 at 5:46pm · Like

October 31 at 5:48pm · Like

October 31 at 5:49pm · Like

 **James Williams** Oh ok well we knew that was happening but weren't sure how to fix it.. Maybe there is a mix up with the versions they're using... Are you sure you didn't repeat the different backgrounds? I thought I saw you comment on github about experiencing it yourself?

October 31 at 5:51pm · Like

 **Yue Li** I haven't seen the backdrop issue so far.  
The one I posted on Git was my guess.

October 31 at 5:55pm · Like

 **James Williams** OK then if we can't repeat it we can't test to see if its present or not in the code and can't tell which versions its in or not in and obviously can't fix it

October 31 at 5:58pm · Like

 **Yue Li** I was thinking if there is a bug between ActionScript and Python code. From my observation, there are identical functions in Python and ActionScript.

October 31 at 5:58pm · Like

 **James Williams** Vanessa said she thinks it has always been in version 3, maybe just not as common in the beta

October 31 at 5:59pm · Like

 **Yue Li** so maybe the best move is to use 8083 as the chances of bugs are less than 8081??  
The one on 8083 should be the well tested one..

October 31 at 6:05pm · Edited · Like

 **James Williams** Yeah, both versions are well tested though, and in theory both have the bug but if its happening less on 8083 then they should use that one for performances etc. I still think they should get the latest code and re-deploy just in case and to clear confusion as the footer should say v3.3

I was wondering a quick question.

Does UpStage follow the star schema when it tries to sort out synchronization among users from different locations/pcs??

I think UpStage probably follows the star schema. I'm not sure though.....

October 28 at 3:28pm

Got the feedback from Anne Takuma Satu Mikhail Chen :

Hi James and team,

I think you have diagnosed this one yourselves – there is far too much going on and none of it is consistent. Basically this means:

Too many colours – every heading is a different colour. Pick a small set and be consistent with using them.

Too many fonts – again this detracts from being able to read the poster and get any information from it.

No consistent approach to presenting the information

Navigation is also seriously challenged. Think about this like 'comments in code', good code is readable and seldom needs comments. Good navigation shouldn't really need arrows – they would seem to be a fix for a less than good format.

Content also needs a lot more work. Do you want to say 'Software is full of bugs' This would seem to call into question what you have been doing for the last two semesters. Overall the content lacks depth, detail and thought. For example what do the three statements below actually say?

- Begin work for a redesign of the software. (What work? What did you actually do? Why?)
- Continue maintenance of current software. (Why? What did this comprise? What did you achieve? Why?)
- Begin focusing more on development of the UpStage Redesign. (What does this mean?)

Or for that matter 'Learned to look at the two tasks;'

Too much generality and little about the actual detail and challenges of your project. Again for example, 'Our efforts this semester laid the ground work as a basis for the future UpStage teams to build off of'. On what basis do you say this?

I think you can (and need to) do much much better than this. Try again and send me another draft for comment if you wish.

Cheers,

Anne

Anyone got any ideas they wanna just throw on here for the poster? The main areas seem to be: Introduction, Objectives and Rationale, Development Process, Challenges, Technical Difficulty, Solutions, Learning, Accomplishments/Deliverables, and possibly a "Future of UpStage". Feel free to contribute anyone 😊

Like · Comment

✓ Seen by everyone

 **Yue Li** We seem have parallel processes. One of them is Version 3 maintenance. The other is research areas.

What Anne suggested using methods from Design Sciences, seemed not working. "We didn't fully understand the current product" is a killer.

After our last meeting, I thought it would be better that we did some coding first and gain enough understanding on Version 3. Then we start working on research.

Well, when we prepared our proposal, Anne said we needed to focus on a "new product"; however, at the time, we didn't define what the new product should look like. (so called the same product, in different languages and platforms?)

October 23 at 9:08pm · Unlike · 1

 **James Williams** cool thanks 😊

October 23 at 9:15pm · Like

 **James Williams** really rough draft (hopefully my girlfriend can give us a hand with the design aspect) but feedback on the content so far? and any suggestions for what else can be added or changed?

October 23 at 10:03pm · Like

 **Takuma Satu** I think it's good as a starting draft!! Two things we can possibly add is section for "Quality Assurance" and Deliverable. Section 3 of poster\_requirements\_and\_assessment\_guide said so lol

For my proof of concept I'm having trouble playing new audio files in html5 because the browser has cached the original one the browser played, and if I try to rename each new file I create, I can't keep a count in javascript because the page gets reloaded after the request is made to python to generate the file, anyone have any knowledge on this sort of stuff and might be able to help me?

Like · Comment

✓ Seen by everyone

 **James Williams** finally had a breakthrough!! got an audio file being played when a button gets pressed in the browser through the network on my pc and my phone, for some reason the onload function works on Chrome on PC and firefox on Ubuntu (the server's host machine in a virtual box) but it doesn't run on Chrome on Android, but if i press the play button the audio does get played. Weird.

October 15 at 12:27pm

I've just noticed that the engine for the TTS in the current software is fine and basically the only way to do it, its using python and espeak which is basically the same as the PYTTSX package I was investigating, but it uses flash to distribute the audio to the client side so its basically the same investigation as replacement for flash. Did you guys doing that make any progress with a prototype? Was the the chosen technology HTML5? We should work together to try to get the TTS using HTML5 to play the audio for the TTS voices in the current software

[Like](#) · [Comment](#)

hi, **Takuma Satu**. I modified grammar and add some features for performance by red words, but I do not understand Gnash. Thus, you may complete it.

another problem I am thinking is about whether we should to add "supporting version of browsers" in compatibility. because some function , as for HTML5, may not work in older version of browsers:

totally,supporting version of browsers for HTML5:

>Chrome 15.0.874

>IE 9.0.8112

>Firefox 8.0.1

>Opera 11.52

I will display detail later

Hey guys, it just occurred to me, as well as marking the different technologies against the metrics, we should measure how important each metric is against each other because some are more important and are 'must haves' for example all features need to be open source. For this we could use the MoSCoW method. Must have, Should have, Could have and Won't have. The other thing we're missing currently is Won't have, so think of what we need to avoid with the technologies we're comparing for example needing to install flash or basically any sort of plugin for the browser is a big no for our clients so executing client side Java is pretty much ruled out with that one...

Powers out at home so might not be able to post again until Tuesday..

But if everyone has decided on their metrics can we try to get a matrix of different technologies and how they rate against each metric and try to find a clear winner out of them if possible?

Once that's done we can send all of them to Anne but don't wait for the rest of the team if you've already found a winner, try to get a prototype of the technology running on a server and executing in a client side bro...

For Flash replacement technology...

"Must have" metrics...

- a) Whether open source.
- b) Works on mobile devices
- c) Supports all functionality of current upstage
  - c.1) Generate graphics ( I think this can be sub-divided into smaller metric)
  - c.2) Handling user inputs
  - c.3) Future support when browsers/OS updates

"Should have" metrics...

- a) Range of major browsers
- b) Additional features that can be used on the stage (?)

Any other ideas?

So for TTS I think the metrics could be:

Open source

Work on mobile/work through the browser/client end

Work with multiple browsers

A large range of voices

Voices sound good/are of high quality

That's all I can think of atm.

But you guys should let me know what you think.

**Takuma Satu** For all I know, there is nothing in the archive from previous students.  
I've been reading this wiki article as a starting point.  
[http://en.wikipedia.org/wiki/Comparison\\_of\\_HTML5\\_and\\_Flash](http://en.wikipedia.org/wiki/Comparison_of_HTML5_and_Flash)

## Comparison of HTML5 and Flash - Wikipedia, the free encyclopedia

HTML5 can be used as an alternative to Adobe Flash.[1] Both include features for playing audio and video within web pages, and integrated vector graphics are possible with both.

**Yue Li** Flash plugin doesn't come with the newest Chrome browser  
(Chromebooks have a built-in version to handle flash).

There are some open source alternatives, such as Gnash and Lightspark.  
However, both projects are under development.

September 26 at 5:52pm · [Like](#)

 **Mikhail Chen** Oh it works on another computer which is using jdk 32 bit. It looks jmf is not supported by jdk 64 bit  
September 26 at 6:48pm · [Like](#)

 **Charlotte Paterson** So i was trying to get MBROLA working with freetts but to use the voices you need to download the mbrola-binaries which I'm having trouble with because they are outdated for my home computer and wont install on uni computers. So I'm looking into alternatives at the moment but plan on spending some time over the weekend on it. CMU Antarctic is a possibility but i haven't done enough research to know that its compatible with fretts yet, also it has a limited number of voices available in comparison with MBROLA.  
September 26 at 7:19pm · [Like](#)

 **Yue Li** **Mikhail Chen**  
I tested it on Arch x64. It works.  

September 26 at 11:25pm · [Like](#)

 **Takuma Satu** I've looked through the entire UpStage documentation archive and found \Documentation\2012-UpStage 2\AS & HTML proposal\proposal.doc  
. This is the only flash related research that our previous team has done 😊  
I've been looking into how to divide this "Flash" problem into smaller research tasks which are: video/audio, Graphics, input widget, communication...etc  
Also found that HTML5 provides tags such as <canvas> for 2d graphics and <video>.for video <- i'm assuming you can stream web-cam video as well.  
Sort of lost on what to do from here...  
September 27 at 1:04pm · [Like](#)

 **James Williams** I think the main thing with flash is that ActionScript needs flash and there are a lot of ActionScript scripts in the software. For TTS I've been looking into FreeTTS for java with MBROLA, I investigated the JavaScript TTS API but it currently only works with Firefox, investigated eSpeak and MeSpeak for Python on Linux and so far it seems promising, I haven't managed to build a working prototype but from the looks of things it would be able to use MBROLA voices the same the current software does, except I can't see exactly how it does it in the current software, I think it uses ActionScript to output the audio on the client which means we'll still need to come up with a different language and way of getting the audio to output in the browser, maybe the javascript path is the most suitable, if it can work with a library of voices such as MBROLA.

Sweet, I'll start combining these into one report for Anne while we wait for **Gaoxin** to give us an update. I'll post it on here before I send it to her to make

sure it has enough detail and is correct

September 27 at 2:15pm · Like · 

**Yue Li** I've done some research on Flash too.

There are Open Source alternatives to Flash. All of them are experimental projects.

Gnash, a team of 3 developers. It's been used over different platforms from Linux to OSX. However, due to it is under experimental phase, the build version is not stable at all for all computer architectures.

HTML5 as [Takuma Satu](#) described, it can do most Flash can do without malicious features. As I experienced, with HTML5, I still can watch videos from Youtube (except all Vevo videos, Vevo videos require Flash plugin installed). My criticism stops here.

So I would think if there any project doing image processing and animation with HTML5, so that we can use those projects for the new UpStage.

For Video Stream technology:

I found 3 possible solutions(as we discussed using BFS):

Webcam Capture in Java

Webcam Capture is maintained by Bartosz Firyn (saxos). The author is based in Poland. The webcam Capture package is quite complex, and the project can be modified with different video streaming libraries (with experienced developers). Most external libraries are also used in media players such as vlcj.

The advantages of Web Capture is the author produced tones of examples and the project has been updated frequently.

The concern: as Webcam Capture is developed as an external library, it will be difficult for us to alter the features among the library (yes, again it is subjective to the expertise of our programming levels)

OpenCV

CV stands for "Computer Vision"

This is another webcam capture project. This project has different interfaces over different programming languages (I haven't looked into all of them yet). I'm interested in this project because it has some features that Webcam Capture doesn't.

As someone demonstrated how to do facial recognition with OpenCV, I found this one could be a good feature for UpStage team to play with.

There are people using this project and it is stable and updated periodically. The developing team is "itseez".

Youtube Streaming API

I came cross with this project while I thought UpStage is used for education purpose, so it would be awesome for stage hosts to play some video clips from Youtube directly without worry losing their stages.

Youtube API is maintained by Google. They provided the libraries for different platforms. It has really good support and documentation.

I'm not sure about it because so far UpStage video streaming technology has nothing to do with such feature.

September 27 at 2:33pm · Unlike · 

**Mikhail Chen** But according to my research, OpenCV has no audio functions which means it doesn't have sound when you only use it. OpenAL(Open Audio Library) is a helpful API for the audio function when you use it with OpenCV together.

September 27 at 3:28pm · Unlike · 

**Mikhail Chen** And JMF (Java Media Framework ) is another java library that enables audio, video and other time-based media to be added to Java applications and applets. It is cross-platform and stable. However I found that JMF is not supported by jdk 1.7 64-bit in Win 7. The following screenshot is my testing by using JMF:

September 27 at 3:41pm · Unlike · 

**James Williams** Oh yeah, there is also a Google TTS API with a really good quality, realistic voice but I haven't investigated how it works, how many different voices there are, which languages can use it etc..

Just going over the Portfolio and I was wondering if anyone had minutes or just general notes from any group meetings, just us, that we've had this semester? We've kinda had a few impromptu ones before our supervisor meetings so we probably don't have minutes recorded for them but it would be good if we could come up with some to put in the portfolio. Also we should probably think about planning maybe a weekly group meeting just to check on what everyone's doing and like officially take down the minutes and make a plan of action for the week to take away from it etc.

I've been way too busy the last little while and I still have to finish my HCI essay but can someone remind me was there something in particular we were supposed to get done this week or is it just the motivational document we're working on at the moment? Were we going to plan who was going to work together on the old code this week? Were we still investigating design science and planning our phases of research etc.? When did that have to be done by does anyone have an idea about that?

Feedback from Anne for our proposal. **Charlotte Gaoxin**

I think for our semester 1, we need to know where we will exactly look into.

This is quite vague at the moment. The fact is we don't know anything yet. I'm thinking to list all the possible architectures that we will research into (Java, .Net or something else license free). so that we can just make up a specific timetable for execution.

We still need to use Agile Development for next year right?? Once we define the method, we will come up with corresponding deliverable.

Deliverable can be all our documents, the design of new UpStage(as we are working with current team) and the initiation of new UpStage development (for some reason, they want details of implementing stages and the progression control thing).

Will Java be a good topic to discuss??? (Anne mentioned this is gonna be a breadth first search...)

any thoughts?

Ok guys got feedback from Anne for the motivational document. There's still a lot of things that need to be done with it so we'll need everyone's input, particularly **Takuma** and **Mikhail** as we've been working on it since last semester. It will be easiest if we continue working on it on the Drive [https://docs.google.com/.../18IWbg-YvSg42t\\_Wgn9nieNRITg.../edit...](https://docs.google.com/.../18IWbg-YvSg42t_Wgn9nieNRITg.../edit...) I've made it so you don't need to sign in if you use the link

Oops, forgot to post this yesterday.

Me (and maybe **Yue**?) will be writing up a blog post for the UpStage website. I will be summarizing what we have done in the past 2 weeks. If you have any artifacts (documents) that you have produced please let me know!!

This is what I am planning to write at the moment.

What has happened : Release of version 3.3. New members!

What we are doing : Requirement gathering and trying to identify corresponding technical challenges of current UpStage. (Graphics, availability to mobiles, text to voice...etc)

What we will be doing: Planning - Define research phases than come up with a detailed plan of who and when we are going to start looking for possible solution (and provide proof of concept).

Any other suggestions?

Like · Comment

Hi team,  
I have received the proposal feedback from Anne.  
She'd like to have a meeting with the whole team (the 6 of us) at 3:30pm on Thursday.  
Will we be able to make it??

Also a message from Helen's email: she wonders if we can change the version number under the html?? I think James asked the same question before... not sure if the corresponding html files are included in the git repo.

Came up with a possible solution for notes/minutes taking tasks:

1: We all take notes during meetings.

2: After meeting, we can give our notes to one member (in digital forms, pictures etc.).

3: The person can make a summary according to all the notes we have.

4: Post the summary onto Google doc, so that the other group members can read and edit before sending it to clients. (Help us to resolve potential conflicts within the team)

5: Forward minutes to client/etc.

In this way, we can have unambiguous minutes... And it shouldn't put too much workload on one member in the team.

What do you think??? If previous team tried such way, how did it go??  
thx

[Like](#) · [Comment](#)

 **Gaoxin Huang** likes this.

Seen by everyone

**James Williams** that's actually really similar to the way we've been doing it. we have a template on our SVN that you guys should have access to as soon as Greg sorts it out for us. We took turns at being the designated note taker and minutes writer, usually the new members do it, and everyone takes notes anyway, and if the note taker needs more info they can ask everyone else for the notes, and the minutes are written up and stored in the directory for them and sent to Anne if it was a meeting with her, otherwise I don't think we send our minutes to our clients

July 30 at 3:32pm · Like

**James Williams** Also, I've designated the note taker for our client meeting on thursday to be Charlotte but you guys should all take your own notes anyway, and then I'll go through writing up the minutes with you guys after the meeting

James Williams yeah thats what i was thinking it would be like. so looking like tuesday or thursday afternoons are best

July 25 at 3:54pm · Like

Takuma Satu agreed.

July 26 at 7:08pm · Like

James Williams were you going to email the times to anne yourself?

July 26 at 7:28pm · Like

Takuma Satu Nope lol I am a very shy asian.

July 27 at 3:18pm · Like

Yue Li As I need to see Anne tomorrow.  
Should I ask her??

July 27 at 3:27pm · Like

James Williams You can mention it if you want but I'll email her when I'm home tomorrow

July 27 at 10:39pm · Like

Gaoxin Huang sorry guys, I have class on Friday, but my teacher told us it should be changed to another time on Friday. Thus, it may affect the available time. However, I will tell you the exact time as soon as possible

July 27 at 11:11pm · Like

James Williams Shouldn't be a problem if its friday I think we'll just try to get a meeting on Tuesdays or Thursdays

July 27 at 11:26pm · Like ·

Gaoxin Huang it is cool.

July 27 at 11:47pm · Like

James Williams email sent. so everyone let us know if your timetable changes

Mikhail Chen i cant find my usb:(, so i m going install ubuntu on my laptop straightly

July 24 at 2:57pm · Like

James Williams haha fair enough

July 24 at 2:57pm · Like

James Williams having trouble installing flash though ughh

July 24 at 3:11pm · Like

James Williams had to manually install mozilla flash plugin following instructions from <https://support.mozilla.org/.../install-flash-plugin-view...>

Install the Flash plugin to view videos, animations and games | Firefox Help

Many websites like YouTube and Facebook require the Adobe Flash plugin to display videos and games. Learn how to install the Flash plugin for Firefox.

SUPPORT.MOZILLA.ORG

James Williams lol, when you guys get your copies of Ubuntu working can you just see if you can load the "Edit/View Media" page. It just crashes Firefox on my one so an entire Module fails lol.

July 24 at 4:47pm · Like

Yue Li hmhm, interesting.

I know for OpenSUSE, I had to install Flash plugin..(via zypper or yast)  
Might have a go with Ubuntu tonight...

July 24 at 5:38pm · Edited · Like

James Williams Installed it on a virtual box and it seems to work all good.  
don't worry about the edit media page not working thing, it was just on the live usb at uni for some reason [Takuma Mikhail](#)

July 25 at 6:00pm · Like

Takuma Satu cool, yeah. most stuff is working on my side 😊

July 26 at 2:48pm · Like

James Williams just testing module 8 on my virtual box since it works, and  
can't upload anything for some reason uuggghhhh so annoying

July 26 at 2:57pm · Like

**James Williams** uploading was the previous module which all passed at uni lol 😊

July 26 at 2:57pm · Like

**James Williams** btw I left the other group so I don't post in it by mistake lol

July 26 at 2:59pm · Like

**Takuma Satu** I'll remain in the old group in-case we want to reference something later 😊

July 26 at 7:08pm · Unlike · 1

**James Williams** oh yeah good thinking haha

July 26 at 7:28pm · Like

**Mikhail Chen** finally I got my ubuntu installed successfully! I have try install it into my laptop and using virtual box but they are all failed by some error. Finally I used VMware and it works wonderfully

July 27 at 5:48pm · Like

**Mikhail Chen** ps: it is so annoying~

Availability based on each team member's timetable except for **Mikhail**

Maybe useful to find us a time slot for the meeting.  
(originally edited in libreoffice calc).

Think about repost my availability here: My availability varies from week to week due to different shifts I take. Ideally I prefer to Meet up between classes on Mondays or Fridays (as I know I will not work during those times).

It seemed not that useful in the afternoon session on South campus today. As nobody does on going projects over there.

I'd be happy to be in this team and look forward to see everyone in the next weeks.

Mon 04-Aug	Tue 05-Aug	Wed 06-Aug	Thu 07-Aug	Fri 08-Aug
