Hi Helen and Vicki,

AUT UpStage Team has 2 new members:
Siatua Uili
William Stokes

At the moment, we are reviewing our plans for Mid-Semester Review and Proposal.

Do you have any particular suggestions on team activities and focuses?

Is it possible to arrange a meeting to introduce new members?? (either a walkthrough or Skype)

Cheers from the AUT UpStage team

---

hey team

and new team!
i am currently at airport - will not be bale to do anything until 18th - maybe a quick skype in the morning then
or 19th morning (say 9am?) 19 evening is also ok at this stage - if you are able to meet outsie of class time
(for Helen to be able to join it needs to be evening or morning as she is in Munich

let me know and we can set up a doodle for the best times

thanks for joining!!
and keeping on keeping on :)

we really love our AUTteams!

hi everyone,
great to have siatua & william on board :) i've also copied in paul rohrlach, former AUT team member & now our wonderful volunteer server admin, in case he is able to join a meeting.

the 19th is tricky for me as i will have a visitor staying with me. in fact everything around the end of march is difficult, & then i'm away for a week over easter.

in the interests of not losing too much time, i could meet with you this week & then we could all meet in april once vicki & i are both back - would that work? (we have in the past talked about having more regular meetings with the team ...)

i made a doodle with some options over the next week here:
http://doodle.com/d4rncfq3qadg9zxr

regarding the team's activities & focusses: as you know we decided last year that we would not keep developing v3, that we need to stop & begin again with a clean slate. so one priority is research & development for the new UpStage. however, this is going to take time, & in the meantime we need to keep using v3 ... & there are still bugs in v3. so even though we know that we don't want to spend too much time patching up v3, it would be great if you could do a review of the outstanding bugs so that we can identify which ones really should be fixed.

one that may or may not have been fixed is the issue of having the correct version & date showing up in the footer; this was apparently fixed, however we currently have 2 different versions on our server (http://upstage.org.nz:8081 and http://upstage.org.nz:8083) but they have the same footer so when we are finding bugs in one version but not in the other it's hard to know if they have been fixed or not. this is one simple thing that should be able to be crossed off the list easily! :)

the bugs are all here: https://github.com/AUTUpStageTeam/UpStage2013/labels/bug & most of them have comments on them.

h :)

Hey everyone!

Welcome newcomers!

Unfortunately I'll be at a conference and won't be able to make the meeting.

-Paul

ok, let's try for this time:

Tuesday 17th, 9pm NZ time
(which is 9am for me in munich)

myself, yue and charlotte can make this time; vicki might be able to join perhaps later in the meeting. if anyone else from the team is able to join, please indicate on the doodle so that we know to expect you.

regarding where to meet, we have a slight problem in that our server is currently down, & we are a bit stuck about fixing it - paul thinks it that the virtual machine needs to be rebooted but this requires douglas to log in to the OpenVZ panel & at the moment we haven't heard back from douglas …

would we be able to meet in an UpStage instance on the AUT server?

h :)

Hi everyone,

It will be difficult to meet up on AUT UpStage servers.

Our current state at AUT:
Many computers were due for their leases over the summer holiday.
Our server machine happens to be one of those computers. We currently do not have a server running

UpStage instance at the moment.

I have talked to the IT Resource staff; however, there was no clear answer about our UpStage server; we do received the hard disk of our server image though.
Not entirely sure it will work.

Yue

Cheers from the AUT UpStage team

hmm, sorry to hear that! i hope you have new computers soon - kind of essential for your work!!

well, the good news is that since i emailed you, i also heard back from douglas, our original server admin, that he has got the server started again. our UpStage instances are not yet running, but fingers crossed paul might be able to do some magic there. (it could also be because i have stuffed up the domain name - i'm trying to fix that at the moment).

if we don't have our server running properly for the 17th, we could use skype or jit.si - it means we won't be able to show the new team members how everything works, but at least we can have a first discussion.

i'll let you know as soon as there's an update on our server.
h :)

So this would be a priority for your team at the moment – getting your server up and running ?

Anne

Yes, I have experience UpStage server installation.

Before I undertake this task, I also want to get permission to install Debian OS on uni computer.
(The new computer runs Win7, I can set it to dual boot for both Debian and Windows)

The estimated time for server recovery will be at 2,3am on Friday. (I finish work at 10pm)

Sincerely
Yue

Cheers from the AUT UpStage team

JItisi might have to be the go (I am still unable to access the server)

Have noted the 17th in my calendar

Hi everyone,

I set up the new UpStage AUT server. It is running on 8081.

However, I'm not sure if it is accessible from external locations.

Maybe AUT firewall blocks all the connections???
I will have a look

the link is
upstage.aut.ac.nz:8081

Regards
Yue

Cheers from the AUT UpStage team

An update from my last email:

I tested AUT server connection at home; I could connect to the server.
Maybe I was running UpStage application on ant.
I will build it properly tomorrow.

Yue

hi yue,
thanks very much for doing this :)

i can't connect to it - i get "Gateway Timeout: can't connect to remote host"

h :)

Hi Helen,

I made a typo in my last email. I meant to say "I can't connect to AUT UpStage server".
I can get responses from the server when I ping it.
Will check the firewall setting soon.

Yue

Made some change.

I think the AUT server is on. I tested it on my phone when it is not connected to AUT network.
I could get to the main page.

Not sure about the

Sorry, I accidentally sent the draft. This is the full content:

Hi everyone,

Made some change on AUT UpStage server.

Our AUT server is on (for connectivity). I tested it on my phone's cellular network.
I could get to the main page. Do we need to edit the content, Text to speech files to get UpStage working???
